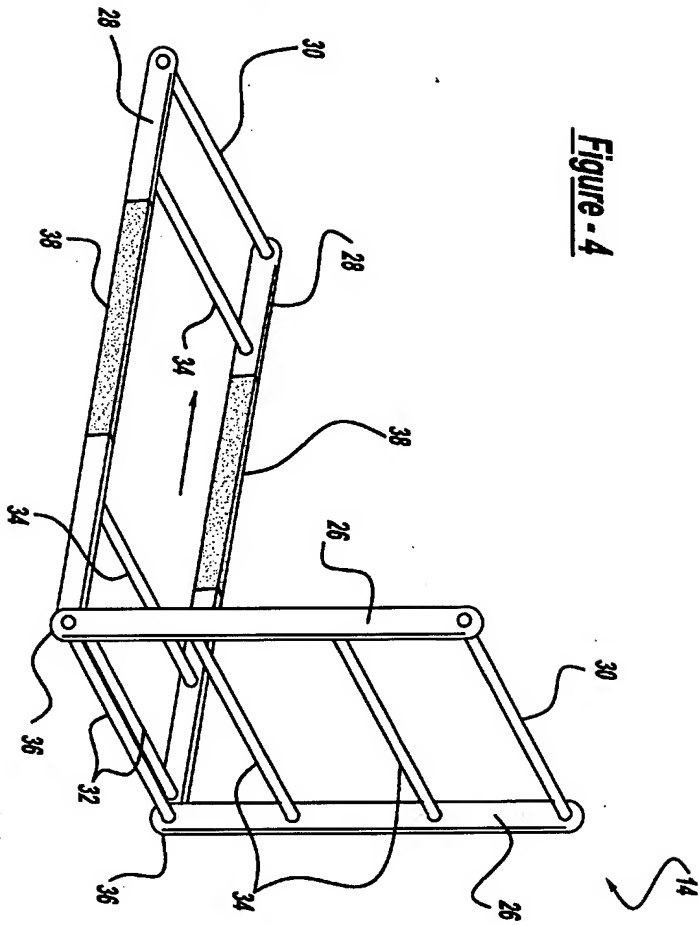

FIG. 4 is a perspective view of the assembly 14 in a partially collapsed state. The assembly 14 includes a main frame 26 with a top rail 30 and a bottom rail 32. A vertical support 34 is positioned between the rails. A horizontal member 28 is attached to the top rail 30 and the vertical support 34. A second horizontal member 38 is positioned below the first one, also connected to the top rail 30 and the vertical support 34. A third horizontal member 36 is located at the bottom of the frame, connected to the bottom rail 32. The assembly is shown in a partially collapsed or folded state.
